Dreamweaver cc - Dreamweaver is a web application used for creating and viewing websites and web applications, mainly used for.Q: Running an 'extra' task in a for loop I am trying to set a schedule where the application will run an 'extra' task, once a week, at a certain time and day. This task will be run in the next 7 days (I just have the schedule and not the actual task) What I have done is to define the schedule and iterate a for loop and this works nicely for this. Note: I cannot define the schedule for all the days, since this would have to be set in advance and that wouldn't be the usual way of scheduling my task. Also note: I don't have a problem with that the task run at a different day, but it has to be set exactly to the date the task was to be run. Using Java 8's CronTrigger public void scheduleTask() { ScheduledExecutorService scheduledExecutor = Executors.newScheduledThreadPool(1); Date startDate = new Date();
